

Third year in a row: Enviro nominated for sustainability award at Recircle Awards

Enviro is once again nominated at the Recircle Awards, this year in the Tyre Pyrolysis Award category. In addition, CEO Thomas Sörensson is nominated for the Best Company Director award. Enviro has previously won the Tyre Pyrolysis Award twice and Best Tyre Recycler last year.

"Enviro is making international progress and our technology is constantly being recognized, it is a great honor to be nominated together with other important sustainability players. Awards like this further highlight the importance of circular solutions for tire recycling," says Thomas Sörensson, CEO of Enviro.

Since 2021, the Recircle Awards have been awarding prizes in a variety of sustainability categories, the award has been established by several prominent players in the rubber and tire industry with the aim of highlighting valuable contributions that promote a circular economy on a global level.

This year, Enviro has the chance to win the **Tyre Pyrolysis Award** for the third time in a row, which is awarded to a pyrolysis company that has made significant contributions to the tire recycling sector.

CEO Thomas Sörensson is also nominated for **Best Company Director**, with the motivation:

"Under Thomas Sörensson's leadership, Scandinavian Enviro Systems has rebuilt its business model and built a relevant team and partnerships with some of the world's largest players to enable SES's development in the pyrolysis sector."

"It is a personal honor and of course a great success for Enviro to be nominated again. This is the result of fantastic work by the entire Enviro team and strengthens our position as the leading player in tire recycling," says Thomas Sörensson.

Enviro's largest shareholder Michelin is also nominated in the category **Best Tyre Derived Recycled Product**.

Anyone can vote in the Recircle Awards.

[Cast your vote for Enviro in the Tyre Pyrolysis Award category.](#)

[Cast your vote for Thomas Sörensson in the Best Company Director category.](#)

Scandinavian Enviro Systems contributes to enhanced environmental and economic sustainability using a patented technology for the recovery of valuable raw materials from scrapped and end-of-life products, including tires. The production of new tires using carbon black recovered with Enviro's technology reduces carbon dioxide emissions by up to 93 per cent compared with the use of virgin carbon black. Enviro has its head office in Gothenburg and a plant for the recycling of end-of-life tires in Åsensbruk. The largest owner is the French tire manufacturer Michelin. Enviro was founded in 2001 and is listed on Nasdaq First North Growth Market.
