Enviro wins prestigious award at the Recircle Awards – third year in a row

Enviro's technology is once again awarded. The company wins the *Tyre Pyrolysis Award* category at this year's Recircle Awards. The award was established by several prominent actors in the rubber and tire industry and aims to recognize valuable contributions that promote a circular economy on a global scale. This is the third consecutive year Enviro has been recognized at the Recircle Awards.

“Seeing all the hard work of our employees over the years being rewarded is a great honor and further proof that our technology is internationally sought after. It is more and more noticeable how global industries are looking for new ways to switch to more circular solutions, where Enviro's recycled materials can be an important piece of the puzzle,” says Thomas Sörensson, CEO of Enviro.

Since 2021, the Recircle Awards have awarded prizes in a number of different sustainability categories. At this year's edition, Enviro was nominated in three categories - *Tyre Pyrolysis Award*, *Best Company Director* and *Industry Achievement Award in the Tyre Recycling Sector*. The latter recognizes important technological advances in tire recycling and Enviro was nominated for its pioneering work in tire pyrolysis.

The award was presented at the [Futurmotive Expo & Talks](#).

In 2022, Enviro won the *Best Tyre Recycler* and *Tyre Pyrolysis Award* categories; in 2021, the company won the *Tyre Pyrolysis Award* category.

Enviro's pyrolysis technology

Enviro's unique pyrolysis technology recovers components from end-of-life tires, including carbon black, steel and oil. The use of Enviro's recovered carbon black, which is sustainability certified in accordance with the international environmental certification system ISCC, results in a reduction of carbon dioxide emissions of up to 93 percent compared to the use of an equivalent amount of virgin carbon black.

Scandinavian Enviro Systems contributes to enhanced environmental and economic sustainability using a patented technology for the recovery of valuable raw materials from scrapped and end-of-life products, including tires. The production of new tires using carbon black recovered with Enviro's technology reduces carbon dioxide emissions by up to 93 per cent compared with the use of virgin carbon black. Enviro has its head office in Gothenburg and a plant for the recycling of end-of-life tires in Åsensbruk. The largest owner is the French tire manufacturer Michelin. Enviro was founded in 2001 and is listed on Nasdaq First North Growth Market.

Mangold Fondkommission AB is Enviro's Certified Adviser on Nasdaq First North Growth Market Stockholm.
