Enviro's Chairman Alf Blomqvist and Board Member Nina Macpherson Speak at COP29 Climate Hub

Scandinavian Enviro Systems (Enviro) is participating today at the Climate Hub conference, held during the UN's climate meeting COP29. Enviro's chairman of the board, Alf Blomqvist, and board member, Nina Macpherson, will take part in a panel discussion on ecocide – mass destruction of the environment – and share how Enviro contributes to both environmental and economic sustainability.

During COP29, a series of side events is being organized, including Climate Hub. Alf Blomqvist and Nina Macpherson will participate in a panel discussion titled "Business leaders for Ecocide Law: Criminalizing Ecocide & Leveling the Playing Field." Alongside Blomqvist and Macpherson, Scania's Head of Sustainability, Fredrik Nilzén, and Johan Falk, CEO of Exponential Roadmap Initiative, will also take part in the discussion.

"The need for international legislation against ecocide is clear, and Climate Hub is an excellent platform for us to discuss both Enviro's position and the work the company is doing to promote the environment and sustainability," says Nina Macpherson, Board Member of Scandinavian Enviro Systems and Chair of the Ecocide Law Alliance, a foundation working to introduce ecocide as a crime under the Rome Statute of the International Criminal Court.

COP29 is being held in Baku, Azerbaijan, and is the 29th edition of the UN climate conference, where countries around the world come together to discuss and negotiate global efforts to combat climate change.

"We are proud to participate in such an important forum and to share Enviro's work in fostering sustainability from both an environmental and economic perspective," says Alf Blomqvist, Chairman of the board of Enviro.

Scandinavian Enviro Systems contributes to enhanced environmental and economic sustainability using a patented technology for the recovery of valuable raw materials from scrapped and end-of-life products, including tires. The production of new tires using carbon black recovered with Enviro's technology reduces carbon dioxide emissions by up to 93 per cent compared with the use of virgin carbon black. Enviro has its head office in Gothenburg and a plant for the recycling of end-of-life tires in Åsensbruk. The largest owner is the French tire manufacturer Michelin. Enviro was founded in 2001 and is listed on Nasdaq First North Growth Market.
