## Construction permit granted for Enviro's planned facility in Uddevalla

**The property owner Fratera has been granted construction permit for the planned recycling plant in Uddevalla, Sweden, in accordance with Enviro's wishes. The construction permit pertains to the previously announced recycling plant that Scandinavian Enviro Systems (publ) ("Enviro", "the company") plans to establish on an industrial site in the Lillesjö district of Uddevalla Municipality, Sweden.**

This summer, Enviro's planned recycling plant in Uddevalla obtained an environmental permit to recycle up to 60,000 tons of end-of-life tyres per year. A final decision on establishment of the new plant is dependent on several factors, such as securing access to end-of-life tyres and agreements covering deliveries of recovered materials.

Scandinavian Enviro Systems contributes to enhanced environmental and economic sustainability using a patented technology for the recovery of valuable raw materials from scrapped and end-of-life products, including tyres. The production of new tyres using carbon black recovered with Enviro's technology reduces carbon dioxide emissions by up to 93 per cent compared with the use of virgin carbon black. Enviro has its head office in Gothenburg and a plant for the recycling of end-of-life tyres in Åsensbruk. The largest owner is the French tyre manufacturer Michelin. Enviro was founded in 2001 and is listed on Nasdaq First North Growth Market.
