

## Scandinavian Enviro System's (publ) tyre pyrolysis oil (TPO) approved as fuel in Wärtsilä's power plants

Wärtsilä Finland Oy has verified that Enviro's tyre pyrolysis oil (TPO) meets their quality standards and can be used as fuel in their power plants with Wärtsilä medium speed diesel engines as prime movers.

"The fact that our oil meets Wärtsilä's strict quality requirements is positive on several levels. We've been working together for a long time investigating the possibility of generating electricity with the pyrolysis oil as fuel. The verification opens up a whole new market area for Enviro's recycled materials and future plant customers, power production can now be offered as an additional added value, says Thomas Sörensson, CEO Enviro."
