

# Information update in the Quarterly report

*N.B. The English text is an in-house translation of the original Swedish text. Should there be any disparities between the Swedish and the English text, the Swedish text shall prevail.*

**In the quarterly report of Scandinavian Enviro Systems (“Enviro” or “The Company”) concerning Q2, 2019, which was published 23th August, extended information occurred in the English version compared to the Swedish due to a mistake in the translation process. As a result, Enviro has decided to publish an updated Swedish report, which now contains the same information as the English version.**

In the translated English version of the report for Q2, some potential customers were by mistake named in a table. In the Swedish version of the report these customers were anonymized. In order to secure that all participants in the market has access to the same information, The Company now has included the more detailed customer information in the Swedish report.

Both the updated Swedish report and the English version are available at the Enviro website.

**Enviro is a company developing, building and operating industrial plants for material recovery from End of Life Tyres (ELT).** The company has developed a process, based on a patented technology, where gas generated in the process is heating the tyres in absence of oxygen. This enables the materials in the tyres to decompose and be recovered instead of incinerated. Thus, a sustainable recovery of the resources Carbon black, Oil, Steel and Gas is obtained. The products are used in new products, replacing fossil resources to help the customers reach their sustainability targets. Enviro was founded in 2001, has its head office in Gothenburg and runs its own plant for ELT tyres in Åsensbruk, Sweden. The company is listed on the First North Growth Market with Mangold Fondkommission AB, tel. +46 (0)8 5030 1550, [ca@mangold.se](mailto:ca@mangold.se), as its Certified Advisor.
